

1. Which are the top three variables in your model which contribute most towards the probability of a lead getting converted?

Ans: These are the top variables that contribute towards the result

- Lead Origin with lead add form
- What is your current occupation with working professional
- Lead Source with elements Welingak website

2. What are the top 3 categorical/dummy variables in the model which should be focused the most on in order to increase the probability of lead conversion?

Ans: Top 3 Categorical/Dummy variables to increase probability are:

- Lead Origin\_lead add form
- What is your current occupation\_working professional
- Lead Source\_welingak website

3. X Education has a period of 2 months every year during which they hire some interns. The sales team, in particular, has around 10 interns allotted to them. So during this phase, they wish to make the lead conversion more aggressive. So they want almost all of the potential leads (i.e. the customers who have been predicted as 1 by the model) to be converted and hence, want to make phone calls to as much of such people as possible. Suggest a good strategy they should employ at this stage.

Ans: Phone calls must be done to people if:

- They are working professionals
- Lead Source could be welingak website
- They spend a lot of time in the website and this can be done by making the website interesting and thus bringing them back to the site.
- Their city is Mumbai, which is also a good factor.

4. Similarly, at times, the company reaches its target for a quarter before the deadline. During this time, the company wants the sales team to focus on some new work as well. So during this time, the company's aim is to not make phone calls unless it's extremely necessary, i.e. they want to minimize the rate of useless phone calls. Suggest a strategy they should employ at this stage.

Ans: In this condition, I would suggest they need to focus more and more on other methods like automated emails and SMS. This way calling won't be required unless it is an emergency. The above strategy can be used but with the customers that have a very high chance of buying the course.

Also the website should be made interesting enough so that SMS/Emails can be sent to those which are in search for the courses.
